

TKP

- 1/ All aerial Mounts are designed for the use of standard UHF, CB, Mobile Phone bases.
 - 2/ Fitting of Large Base antennas is of the installer's discretion.
 - 3/ It is the installers responsibility to check all clearances of bracket and antenna base to the body work and windscreen before closing bonnet.
 - 4/ Vehicle year model selection is a very hard to determine and different country of manufacture can also change bracket selection.
 - 5/ Each Bracket is hand Made and Bent to a model sample requirement at factory. Slight variations may occur.
- You may need to make slight adjustments to get perfect vertical alignment.
- 6/ Product made from stainless steel for maximum strength and durability.
